Assignment 8
Peter Stanton, Pouria Ghadimi, Mark Belyak

Debating for Private data Centers:

- You have control all over your own network
- It is fully customizable by the owner
- You have your own private security system
- More cost effective for large companies
- A data center is physically connected to a network which makes it easier to ensure those with company-approved credentials and equipment can access stored apps and information.

We didn't win the argument! ☺

Example of a company: Visa, Master Card, CIA
